

Exercise 1: Setting Up J Unit

Calculator.java

```
package org.example;

public class Calculator {

    public int add(int a, int b) {
        return a + b;
    }
}
```

CalculatorTest.java

```
package org.example;

import org.junit.jupiter.api.Test;

import static org.junit.jupiter.api.Assertions.assertEquals;

public class CalculatorTest {

    @Test
    void testAdd() {
        Calculator calculator = new Calculator();

        assertEquals(5, calculator.add(2, 3));
    }
}
```

Output:
